SUMMARY

Frontend Developer with hands-on experience building accessible, responsive, and performance-focused web applications using React.js, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, and Vite. Currently serving as a Frontend Developer Intern at Namrata Universal, contributing to scalable UI development, REST API integration, and frontend performance optimization. Developed over 15 frontend projects using modern frontend technologies, focusing on scalable architecture, performance optimization, accessibility, and maintainable code practices.

WORK EXPERIENCE

Frontend Developer Intern | Namrata Universal

Nov 2025 – Present

- Developed modular and cross-device compatible UI components using React.js and Tailwind CSS for production-ready web applications.
- Integrated REST APIs to enable dynamic content rendering and improve user interaction with real-time data.
- Improved frontend performance through asset optimization, lazy loading, and route-based code splitting.
- Worked with designers and developers using Git and GitHub workflows, contributing to feature implementation and code review processes.

TECHNICAL SKILLS

- Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
- State Management & Routing: Redux Toolkit, React Router, Context API
- API & Data Handling: REST APIs, Axios, Postman (API Testing)
- Testing & Tooling: Vite, Vitest, React Testing Library, ESLint, Prettier
- Design & UI: Responsive Web Design, Web Accessibility, Cross-Browser Compatibility, Swiper.js
- Version Control & Deployment: Git, GitHub, Vercel, Netlify
- Performance & Optimization: Performance Optimization, Debugging, Lazy Loading, Code Splitting, Image Optimization
- SEO & Best Practices: SEO Fundamentals, Semantic HTML, Open Graph Tags, Structured Metadata, Lighthouse Optimization

PROJECTS

Furnilo – Furniture E-commerce Web Application

Tech Stack: React.js, JavaScript (ES6+), Tailwind CSS, React Router, Vite

- Developed a responsive furniture e-commerce application using React.js and Tailwind CSS.
- Implemented category, subcategory, and room-based product filtering functionality.
- Built scalable component architecture for product listings and navigation systems.
- Designed an intuitive shopping experience with optimized user flows and navigation patterns.
- Optimized application performance through route-based chunk loading, lazy loading, and asset optimization.

GlobeScope – REST Countries Explorer

Tech Stack: React.js, Vite, Tailwind CSS, REST Countries API

- Built a country explorer with adaptive layouts and region-based filtering.
- Integrated REST Countries API and enhanced client-side data rendering for a smoother user experience.
- Designed dark/light theme switching and efficient state management patterns.
- Implemented custom hooks, memoization strategies, and lazy loading to enhance maintainability and runtime performance.
- Achieved Lighthouse scores of 99/100 (Performance) and 100/100 in Accessibility, Best Practices, and SEO.

Portfolio Website

Tech Stack: React.js, Vite, Tailwind CSS, Matter.js

- Built and deployed a personal developer portfolio using React.js, Vite, Tailwind CSS, and Matter.js.
- Implemented interactive physics-based animations using Matter.js to enhance user engagement and visual experience.
- Achieved Lighthouse Performance scores of **99/100 (Mobile)** and **100/100 (Desktop)**.
- Maintained perfect **100/100 scores** in Accessibility, Best Practices, and SEO.
- Optimized application performance through lazy loading, code splitting, image optimization, and efficient asset delivery.

Namrata Universal Website Redesign (Frontend Clone Project)

Tech Stack: React.js, Tailwind CSS, Vite

- Optimized user experience across desktop, tablet, and mobile devices.
- Implemented semantic HTML and structured metadata to improve search visibility and accessibility.
- Created maintainable React components following modern frontend patterns.
- Achieved Lighthouse scores of 98/100 (Performance) and 100/100 in Accessibility, Best Practices, and SEO across mobile and desktop experiences.

MS Trackify – Expense Tracker Application

Tech Stack: React.js, Redux Toolkit, Tailwind CSS

- Developed an expense management application with CRUD operations, filtering, sorting, and centralized state management using Redux Toolkit.
- Built reusable components and responsive layouts.

EDUCATION

- MCA, IGNOU Prayagraj | Jul 2014 – Jun 2016
- BCA, IGNOU Prayagraj | Jul 2011 – Jun 2014

CERTIFICATIONS

- JavaScript Algorithms & Data Structures – freeCodeCamp | June 2025
- Responsive Web Design – freeCodeCamp | Feb 2025

SOFT SKILLS

• Communication • Team Collaboration • Problem Solving • Adaptability

LANGUAGES

- Hindi (Native)
- English (Intermediate)
