Location: Mukherjee Nagar, Gopalpur, Delhi 110009

SUMMARY

Front-End Developer skilled in HTML5, CSS3, JavaScript (ES6+), React, Tailwind CSS, and Redux Toolkit, currently learning Node.js. Front-End Developer Intern at Namrata Universal, contributing to responsive and scalable UI development with REST API integration, lazy loading, and code splitting. Built and deployed 10+ front-end projects live on Netlify, with strong focus on clean UI, performance optimization, debugging, and accessibility best practices.

WORK EXPERIENCE

Front-End Developer Intern | Namrata Universal

Nov 2025 – Present

- Developing and optimizing responsive UI components using React and Tailwind CSS.
- Integrating front-end components with **REST APIs** and focusing on performance-oriented UI enhancements.
- Collaborating on component-based architecture to maintain clean and scalable front-end code.

Front-End Developer | E-commerce Web App (UI Development)

Jan 2026 – Present

- Developing the UI for an e-commerce web application using React and Tailwind CSS
- Built responsive layouts, product listing pages, and reusable UI components.
- Structuring the front-end to support future **Node.js backend integration**.

Front-End Developer | Personal Projects

Jan 2024 – Present

- Developed and deployed **multiple interactive front-end applications** using React, Redux Toolkit, Tailwind CSS, and Vite.
- Built a **REST Countries Explorer** application featuring live API data fetching, dark/light mode, search, and filtering for improved usability and accessibility.
- Implemented modern performance practices such as **lazy loading, code splitting, and image optimization** across projects.
- Created reusable UI components and maintained clean, readable, and scalable front-end codebases.
- Performed **unit testing** using Vitest and React Testing Library to improve application reliability.
- Deployed projects on **Netlify** and managed source code using Git & GitHub.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React, Tailwind CSS
- **State Management & Routing:** Redux Toolkit, React Router, Context API
- **API & Data Handling:** REST APIs, Axios, Postman (API testing)
- **Testing & Tooling:** Vite, Vitest, React Testing Library, ESLint, Prettier
- **Design & UI:** Responsive Design, Cross-Browser Compatibility, Swiper.js, Figma (Basic)
- **Version Control & Deployment:** Git, GitHub, Netlify
- **Performance & Optimization:** UI Optimization, Debugging, Lazy Loading, Code Splitting.

PROJECTS

MS Trackify – Expense Tracker App

- Created a responsive expense tracker with add, edit, delete, filter, sort features.
- Managed complex application state using Redux Toolkit, ensuring seamless data flow across components.
- Live: <https://mstrackify.netlify.app> | Code: <https://github.com/Magan248/TrackifyApp>

REST Countries Explorer – Country Data App

- Developed high-performance search and filtering logic to efficiently handle large datasets, with support for dark/light mode.
- Implemented shimmer loading effects and **lazy loading** to enhance user experience and performance.
- Live: <https://globescope.netlify.app> | Code: <https://github.com/Magan248/GlobeScope>

StrideZone – Shoe Company Website

Designed modern, responsive landing page with interactive product previews, and modal popups.

- Focused on clean UI design and cross-device compatibility.
- Live: <https://stridezone.netlify.app> | Code: <https://github.com/Magan248/StrideZone>

Quiz App – Interactive Web App

- Developed a 25-question quiz application with timer, sound feedback, and animations.
- Used **React Hooks, Redux Toolkit, and React Router** for state management and navigation.
- Live: <https://quizappcirclesresult.netlify.app> | Code: <https://github.com/Magan248/quiz-app>

(See more Projects on GitHub: <https://github.com/Magan248>)

Furnilo – Furniture E-commerce Web Application (Ongoing)

Tech Stack: React, JavaScript (ES6+), Tailwind CSS, React Router, Vite

- Developing a responsive furniture e-commerce web application inspired by modern marketplaces.
- Building scalable product taxonomy with room, category, and subcategory based filtering.
- Implementing dynamic routing and reusable component architecture.
- Creating responsive mega menus and mobile-first navigation experience.
- Optimizing frontend performance with lazy loading and code splitting.
- Managing structured product data and category-driven UI rendering.

EDUCATION & QUALIFICATIONS

- MCA | IGNOU, Prayagraj | Jul 2014 – Jun 2016
- BCA | IGNOU, Prayagraj | Jul 2011 – Jun 2014
- 12th |UP Board | Jul 2010 – Jun 2011
- 10th |UP Board |Jul 2008 – Jun 2009

CERTIFICATIONS

- Responsive Web Design – freeCodeCamp (Feb 2025)
- JavaScript Algorithms & Data Structures – freeCodeCamp (June 2025)
